
Predicted SO(3) pose distributions — modes match each solid's symmetry group (headline NeST model)
Tetrahedron (12 modes)
Cube (24 modes)
Icosahedron (60 modes)
Cone (360 modes)
Cylinder (720 modes)
predicted density (size ∝ prob)
ground-truth symmetry set
SO(3) rotations as the canonical axis
on an equal-area Mollweide projection;
hue encodes the third (roll) angle.
